Bridge Thesis

- Proven IDP wedge (ocr.fracto.tech) → expand into end-to-end workflows.
- Workflow builder + marketplace services (PDF/LLM/OCR/RPA).
- Residency-first deployments with immutable audit trails.
- Closed-loop execution: tasks/approvals → write-back into LOS/ERP/TMS.

Problem — Manual DocumentOps Bleeds Cost & Time

₹2.55L / 10K DOCS IN MANUAL DRAG.

Teams still rekey documents across inboxes, portals, and spreadsheets.

Where time leaks

- Underwriting: 7–12 docs per case.
- Logistics: 10–15 min per PoD/LR.
- Rework: 4–8% leakage + SLA hits.

Cost impact

- ₹2L / month on keying.
- ₹40k / month on rework.
- ₹15k / month on SLA/audits.

At 100k docs: ~₹25L/month drag.

Why Now — Models, Regulation & Buyer Pull

VLM reliability, residency mandates, and buyer pull now align.

Signals in motion

- **2019–2022:** VLMs handle unseen layouts.
- **2023:** Residency mandates in India + GCC.
- **2024–2025:** Buyers demand closed-loop outcomes.

Buyer baseline

- Local VPC hosting + immutable audit logs.
- Exception handling via tasks + approvals (not spreadsheets).
- Write-back into core systems (with replayable runs).

Regulation + reliability + vendor risk now overlap.

Growth focus

- India: 25–30% CAGR (NBFCs, banks, logistics).
- GCC: 22–26% CAGR (payroll, trade, logistics).
- Global: 18–20% CAGR (enterprise IDP refresh).

What We Do — Workflow Automation for Document-heavy Ops

TWO PRODUCTS: IDP (OCR.FRACTO.TECH) + WORKFLOWS (BUILDER + MARKETPLACE + OPS CONSOLE).

Define the workflow once; every run is traceable, testable (dry-run), and residency-safe.

PRODUCT

Fracto IDP + Workflows

- IDP: self-serve extraction UI + APIs at **ocr.fracto.tech**.
- Intake: email, webhooks, API (attachments included).
- Extract + validate: VLMs plus deterministic policy checks.
- Execute: destinations (HTTP/Sheets), RPA, notifications.
- Operate: run history + artifacts, tasks/approvals, audit log.

HOW IT WORKS

4-step loop

- 1 Intake**
Email/webhook/API → one workflow run.
- 2 Parse & normalize**
Turn payloads + attachments into clean text + fields.
- 3 Extract & validate**
Classify, extract, and route exceptions to tasks/approvals.
- 4 Execute**
Write-back, RPA, and notifications — logged end-to-end.

OUTCOMES

Ops impact in weeks

- ≤30s turnaround from doc → system.
- Exceptions only with audit trails.
- India/UAE VPC deployments ready.
