AI Workflows for Document-Heavy Operations

Fracto handles document intake, checks, approvals, and system updates for regulated operations teams.

USED BY OPERATIONS TEAMS IN INDIA AND THE GULF ACROSS LENDING, LOGISTICS, AND COMPLIANCE-HEAVY WORKFLOWS.

Lending teams · Logistics teams · Compliance-heavy workflows · Audit-ready automation

---

CATEGORY

CORE

AI workflows

For document-heavy operations

BUILT-IN

Document AI

Reads, extracts, and structures documents

SCALE

More workflows + volume

Expansion revenue over time

Problem — Manual Document Workflows Create Cost + Compliance Risk

INBOX → SPREADSHEETS → THREADS → CORE SYSTEMS.

Baseline workflow today

1. **INBOX / PORTAL / WHATSAPP**
   PDFs, scans, emails, attachments.
2. **KEYING + SPREADSHEETS**
   Manual extraction, checks, rework.
3. **APPROVALS IN THREADS**
   Email/WhatsApp approvals, missing trail.
4. **CORE SYSTEMS**
   LOS / ERP / TMS updated by hand.

Result: exceptions are not tracked end-to-end; audit evidence lives in folders + message threads.

Operational impact

- SLA delays (manual keying + rework).
- Audit gaps (approvals in threads).
- Cost scales linearly with volume.

OCR alone isn’t enough — teams need approvals, audit trails, and controlled system updates.

Why Now — Buyers Need Local Hosting, Audit Trails, and Reliable Document Automation

SECURITY AND COMPLIANCE CHECKS NOW HAPPEN BEFORE PILOTS, SO BUYERS CHOOSE TOOLS THEY CAN ACTUALLY DEPLOY.

3 triggers

- **Local data handling:** many buyers now expect in-region processing in India or the UAE.
- **Safer vendor setup:** buyers want audit trails, clear controls, and a clean way to exit if needed.
- **Better document automation:** extraction quality is now good enough to run full workflows, not just pilots.

What changed in buying behavior

- Point OCR pilots are being replaced by budgets for full workflow automation.
- Security, audit rights, and exit terms are reviewed before a pilot starts.
- Buyers prefer tools that plug into existing systems instead of creating another manual layer.

This is no longer a simple OCR buying decision; it is a core workflow software decision for regulated teams.

Market Opportunity — Start with BFSI & Logistics, Then Expand

INDIA + GCC ~$1.5B SPEND ('25E) · GLOBAL $15–17B TAM

Market size snapshot

$0.9B India document workflow spend ('25e)

$0.6B GCC document workflow spend ('25e)

$15–17B Global document automation TAM ('25e)

Wedge → expand

NBFC underwriting · Logistics billing · Compliance + audit

Start with high-volume document workflows, then expand across more workflows and higher throughput per customer.

AI Workflow Platform with Built-in Document AI

ONE PLATFORM FOR INTAKE, EXTRACTION, VALIDATION, APPROVALS, AND SYSTEM UPDATES.

Designed to replace inbox → spreadsheet → thread handoffs with one accountable workflow run.

PRODUCT

AI workflows

- Built-in document AI
- Policy validators
- Tasks + approvals
- Controlled write-back

HOW IT WORKS

4-step loop

1. **INTAKE** Email / webhook / API → one workflow run.
2. **PARSE + NORMALIZE** PDFs → clean text + fields.
3. **EXTRACT + VALIDATE** Checks + exception routing.
4. **EXECUTE** Approvals → controlled write-back.

OUTCOMES

Ops impact in weeks

- Fewer handoffs
- Exceptions-only operations
- Audit-ready execution

Traction — Customer Adoption

CUSTOMER REFERENCES ACROSS INDIA AND THE GCC IN LENDING, LOGISTICS, AND OTHER COMPLIANCE-HEAVY OPERATIONS.

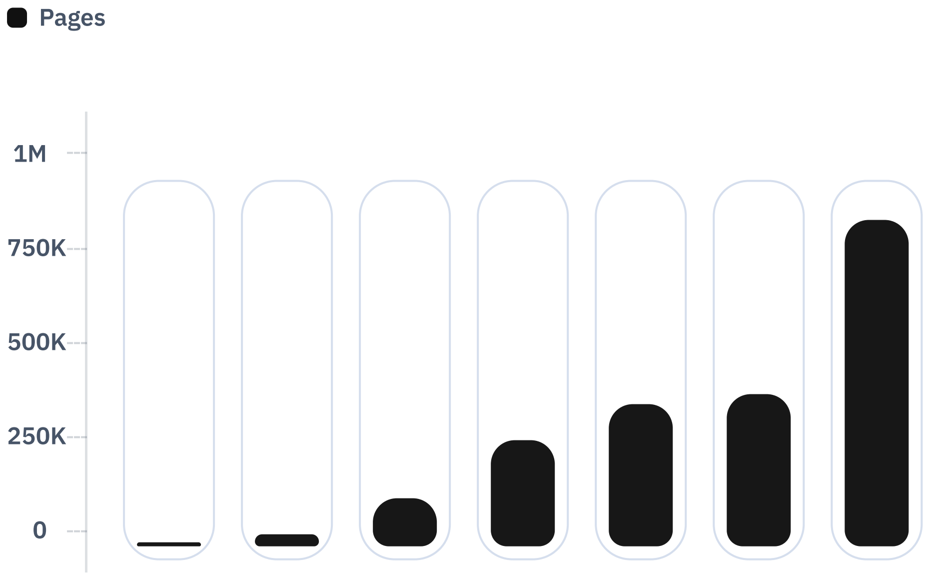
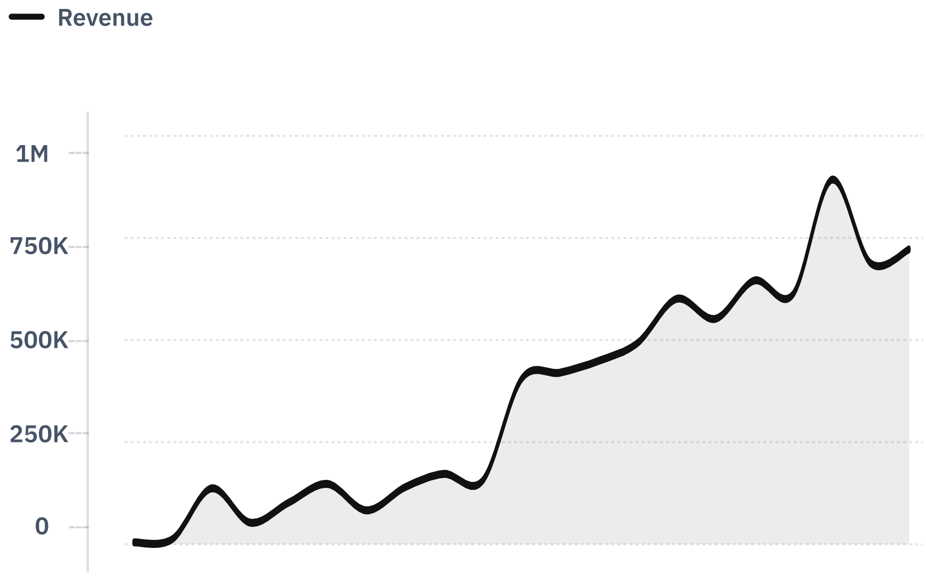
Traction — More Usage, More Revenue

AS CUSTOMERS PROCESS MORE DOCUMENTS AND ADD WORKFLOWS, RECURRING REVENUE RISES WITH THEM.

Quarterly pages processed



Monthly revenue (₹)



Moat — Local, Embedded, and Compounding

RESIDENCY-FIRST DEPLOYMENTS + SYSTEM-OF-RECORD INTEGRATIONS + WORKFLOW INTELLIGENCE CREATE A COMPOUNDING ADVANTAGE IN BFSI AND LOGISTICS.

Deployment moat India/UAE VPC-ready for residency, security, and audit-sensitive buyers

Workflow moat Embedded in approvals, exceptions, and controlled write-back into LOS/ERP/TMS

Learning moat Customer-specific validators and exception logic compound with every live workflow

HARD TO CLEAR

Residency + audit review

Generic AI vendors lose time here before production starts

HARD TO RIP OUT

Approvals + write-back

Once Fracto sits in the approval path, it becomes operating infrastructure

HARDER EVERY MONTH

Rule coverage compounds

Validators and exception logic improve with each live workflow

Competitors can match extraction; they struggle to match local deployment, audit-native execution, and workflow intelligence accumulated across live regulated operations.

Pricing & Unit Economics — Platform + Usage

BASE PLATFORM + SETUP + VOLUME-BASED USAGE.

Example: 100k pages/month → ~₹2.5L usage + ₹25k base.

₹2.5 Cr Momentum Bridge — Plan and Ask

₹2.5 CR BRIDGE TO GROW FROM ₹0.87 CR TO ABOUT ₹10 CR IN ANNUAL RECURRING REVENUE, WHILE COMPLETING SOC 2 AND STANDARD HOSTED DEPLOYMENTS FOR INDIA AND THE GULF.

Standard seed convertible note, targeting 3-5 investors.

Target close: Q1 2026.

ARR today · ₹0.87 Cr — **12-month target · ₹10 Cr ARR**

Use of funds (₹2.5 Cr)

CATEGORY	KEY DELIVERABLE
GTM	Growth team + partnerships
Product	Validators + add-ons
Compliance	SOC-2 + audits
Infra	India/UAE VPCs

12-month plan & outcomes

Revenue engine RECURRING REVENUE GROWTH + GO-TO-MARKET TEAM

Grow from ₹0.87 Cr to about ₹10 Cr in annual recurring revenue through customer expansion and new sales.

Product HIGHER AUTOMATION + MORE WORKFLOWS PER CUSTOMER

Increase straight-through automation, expand usage per customer, and reduce deployment time for new workflows.

Compliance + local deployment SOC 2 + HOSTED DEPLOYMENT KITS

Complete SOC 2 Type II and standardise repeatable hosted deployments for India and the Gulf.

Next Steps & Diligence Path

WORKING SESSION → WORKFLOW DEEP DIVE → DILIGENCE CADENCE.

How we propose to engage

- **30-minute working session** to align on fit.
- **Tailored deep dive** on priority workflows.
- **Diligence & closing path** with a clear cadence.
- **Data room** available after the first call.
