

AI Workflows for Document-Heavy Operations

Fracto handles document intake, checks, approvals, and system updates for regulated operations teams.

USED BY OPERATIONS TEAMS IN INDIA AND THE GULF ACROSS LENDING, LOGISTICS, AND COMPLIANCE-HEAVY WORKFLOWS.

Lending teams

Logistics teams

Compliance-heavy workflows

Audit-ready automation

CATEGORY

CORE

AI workflows

For document-heavy operations

BUILT-IN

Document AI

Reads, extracts, and structures documents

SCALE

More workflows + volume

Expansion revenue over time

Problem — Manual Document Workflows Create Cost + Compliance Risk

INBOX → SPREADSHEETS → THREADS → CORE SYSTEMS. THE MEASURABLE PAIN IS REWORK, SLA DELAY, AND AUDIT EXPOSURE.

Baseline workflow today

1 INBOX / PORTAL / WHATSAPP
PDFs, scans, emails, attachments.

2 KEYING + SPREADSHEETS
Manual extraction, checks, rework.

3 APPROVALS IN THREADS
Email/WhatsApp approvals, missing trail.

4 CORE SYSTEMS
LOS / ERP / TMS updated by hand.

Result: exceptions are not tracked end-to-end; audit evidence lives in folders + message threads.

Operational impact

- SLA delays (manual keying + rework).
- Audit gaps (approvals in threads).
- Cost scales linearly with volume.

MEASURE

Docs / month

Volume where manual work becomes a budget line.

MEASURE

Rework %

Exceptions, missing fields, duplicate review.

MEASURE

SLA hours

Delay from intake to system-ready output.

OCR alone isn't enough — teams need approvals, audit trails, and controlled system updates.

Why Now — Buyers Need Local Hosting, Audit Trails, and Reliable Document Automation

SECURITY AND COMPLIANCE CHECKS NOW HAPPEN BEFORE PILOTS, SO BUYERS CHOOSE TOOLS THEY CAN ACTUALLY DEPLOY.

3 triggers

- **Local data handling:** many buyers now expect in-region processing in India or the UAE.
- **Safer vendor setup:** buyers want audit trails, clear controls, and a clean way to exit if needed.
- **Better document automation:** extraction quality is now good enough to run full workflows, not just pilots.

What changed in buying behavior

- Point OCR pilots are being replaced by budgets for full workflow automation.
- Security, audit rights, and exit terms are reviewed before a pilot starts.
- Buyers prefer tools that plug into existing systems instead of creating another manual layer.

This is no longer a simple OCR buying decision; it is a core workflow software decision for regulated teams.

Market Opportunity — Start with BFSI & Logistics, Then Expand

INDIA + GCC ~\$1.5B SPEND ('25E) · GLOBAL \$15–17B TAM

Market size snapshot

\$0.9B India document
workflow spend ('25e)

\$0.6B GCC document
workflow spend ('25e)

\$15–17B Global
document automation TAM

Wedge → expand

NBFC underwriting

Logistics billing

Compliance + audit

Best first wedge: teams processing 10k+ pages/month where extracted data must be validated, approved, and written back to LOS/ERP/TMS.

BUYER

Ops + compliance owner

Clear business owner for SLA and audit outcomes.

DATA PATH

System of record known

Output has to update an existing core system.

EXPANSION

More workflows per logo

Usage grows via volume and adjacent document flows.

AI Workflow Platform with Built-in Document AI

ONE PLATFORM FOR INTAKE, EXTRACTION, VALIDATION, APPROVALS, AND SYSTEM UPDATES.

Designed to replace inbox → spreadsheet → thread handoffs with one accountable workflow run.

PRODUCT

AI workflows

Built-in document AI

Policy validators

Tasks + approvals

Controlled write-back

HOW IT WORKS

4-step loop

1

INTAKE

Email / web-hook / API → one workflow run.

2

PARSE + NORMALIZE

PDFs → clean text + fields.

3

EXTRACT + VALIDATE

Checks + exception routing.

4

EXECUTE

Approvals → controlled write-back.

OUTCOMES

Ops impact in weeks

Fewer handoffs

Exceptions-only operations

Audit-ready execution

Traction — Customer Adoption

CUSTOMER REFERENCES ACROSS INDIA AND THE GCC IN LENDING, LOGISTICS, AND OTHER COMPLIANCE-HEAVY OPERATIONS; DILIGENCE SHOULD SEPARATE LIVE, EXPANDING, AND PILOT ACCOUNTS.

Monthly onboardings

— Onboardings

ACTIVE CLIENTS

35+

Segment by live, expansion, and pilot during diligence.

ARR RUN-RATE

₹0.87 Cr

Sep expected: ₹1.79 Cr from client confirmations.

PAGES PROCESSED

2M+

Usage proof across recurring document workflows.

INDIA REFERENCES

GCC REFERENCES

Traction — More Usage, More Revenue

AS CUSTOMERS PROCESS MORE DOCUMENTS AND ADD WORKFLOWS, RECURRING REVENUE RISES WITH THEM.

Quarterly pages processed

■ Pages

Monthly revenue (₹)

Actuals through May '26; dashed segment is expected from client confirmations.

— Actual revenue - - - Expected from client confirmations

Moat — Local, Embedded, and Compounding

RESIDENCY-FIRST DEPLOYMENTS + SYSTEM-OF-RECORD INTEGRATIONS + WORKFLOW INTELLIGENCE CREATE A COMPOUNDING ADVANTAGE IN BFSI AND LOGISTICS.

Deployment moat India/UAE VPC-ready for residency, security, and audit-sensitive buyers

Workflow moat Embedded in approvals, exceptions, and controlled write-back into LOS/ERP/TMS

Learning moat Customer-specific validators and exception logic compound with every live workflow

Logistics document-to-billing flow

Input PoDs, LRs, delivery proofs, invoice attachments.
Workflow Read → validate against shipment data → approval queue → TMS/ERP update.
Expansion Starts with billing support, then expands to claims, reconciliation, and audit packs.

Lending document-to-underwriting flow

Input KYC, income, academic, bank, and borrower support documents.
Workflow Classify → extract → policy checks → exception review → LOS-ready output.
Expansion Starts with one document pack, then adds more checks and downstream write-back.

Competitors can match extraction; they struggle to match local deployment, audit-native execution, and workflow intelligence accumulated across live regulated operations.

Pricing & Unit Economics — Platform + Usage

BASE PLATFORM + SETUP + VOLUME-BASED USAGE.

Example: 100k pages/month → ~₹2.5L usage + ₹25k base.

Base platform

MRR

₹5k–₹25k / month

Setup

ONE-TIME

₹15k–₹35k

Usage

VOLUME PRICING

ACTUAL TODAY

₹0.87 Cr ARR

May '26 revenue run-rate.

CONFIRMED PATH

₹1.79 Cr ARR

Sep '26 expected from client confirmations.

BRIDGE TARGET

₹10 Cr ARR

Expansion + new logo GTM motion.

Revenue engine RECURRING REVENUE GROWTH + GO-TO-MARKET TEAM

Convert the confirmed Sep '26 path into a ₹10 Cr ARR motion through customer expansion and new logo sales.

Product HIGHER AUTOMATION + MORE WORKFLOWS PER CUSTOMER

Increase straight-through automation, expand usage per customer, and reduce deployment time for new workflows.

Compliance + local deployment SOC 2 + HOSTED DEPLOYMENT KITS

Complete SOC 2 Type II and standardise repeatable hosted deployments for India and the Gulf.

Next Steps & Diligence Path

WORKING SESSION → WORKFLOW DEEP DIVE → DILIGENCE CADENCE.

How we propose to engage

- **30-minute working session** to align on fit.
- **Tailored deep dive** on priority workflows.
- **Diligence & closing path** with a clear cadence.
- **Data room** available after the first call.
