

AI INFRASTRUCTURE FOR INDUSTRIAL SALES OPS

Turn messy industrial orders into ERP-ready line items.

Fracto reads WhatsApp, email, PDF, and handwritten order requests, matches product masters, and returns quote-ready rows.

- Read WhatsApp images, emails, PDFs, and handwritten lists
- Extract item, part/spec, size, quantity, UOM, and notes
- Match aliases, product names, grades, and part codes to SKUs
- Flag unclear rows for review

Steel & metals

Industrial distributors

Fabrication & EPC

Machinery & equipment

Cables, pumps, valves

Material desks

What this changes

Order ready

Message to line items

Master matched

Aliases to products

Ops ready

Clean fields and flags

Quote faster

Less retyping

Positioning

Manual order reading out. Product-master matched rows in.

THE OPERATIONAL PROBLEM

Industrial order intake breaks between customer messages and ERP.

Photos, PDFs, emails, and shorthand still have to become product-master matched quote rows.

01

Order arrives

WhatsApp, email, PDF, image, or chat list.

02

Decode

Part codes, product names, grades, sizes, UOM.

03

Match

SKU, customer item, grade, brand, UOM.

04

Enter

Quote, ERP, Excel, or review queue.

Why it slows down

- ERP names differ from customer shorthand
- One row can include spec, quantity, UOM, and delivery notes
- Brand, grade, part code, or size may be implied

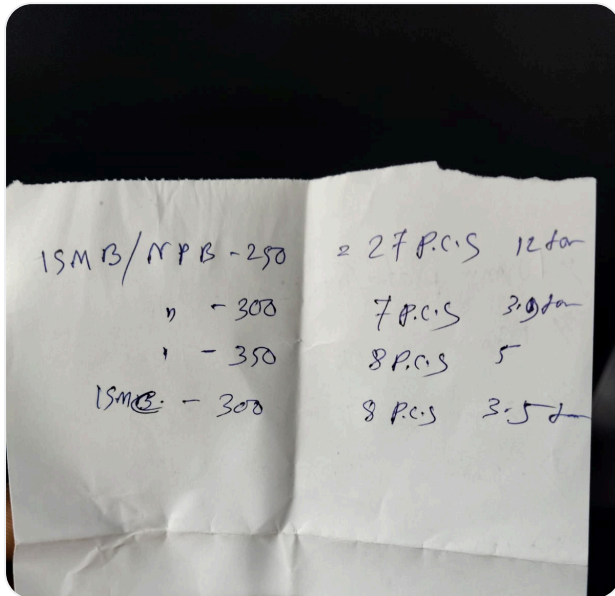

What Fracto adds

- Domain-aware extraction for industrial orders
- Product-master lookup before quote/order entry
- Exception routing for unclear rows

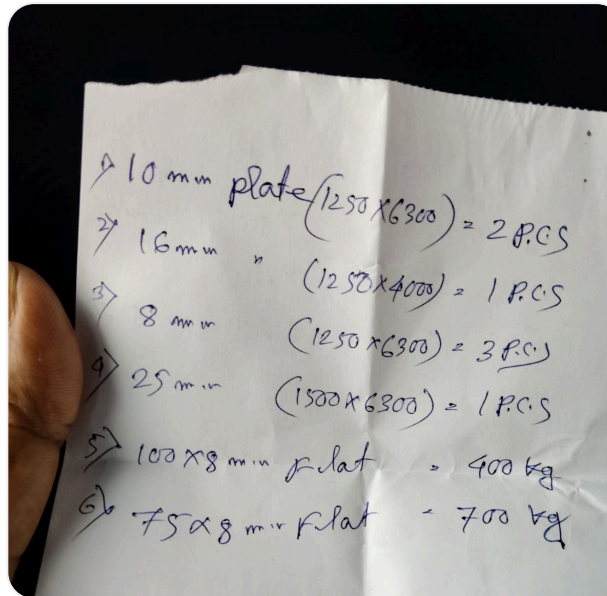

SAMPLE ORDER INPUTS

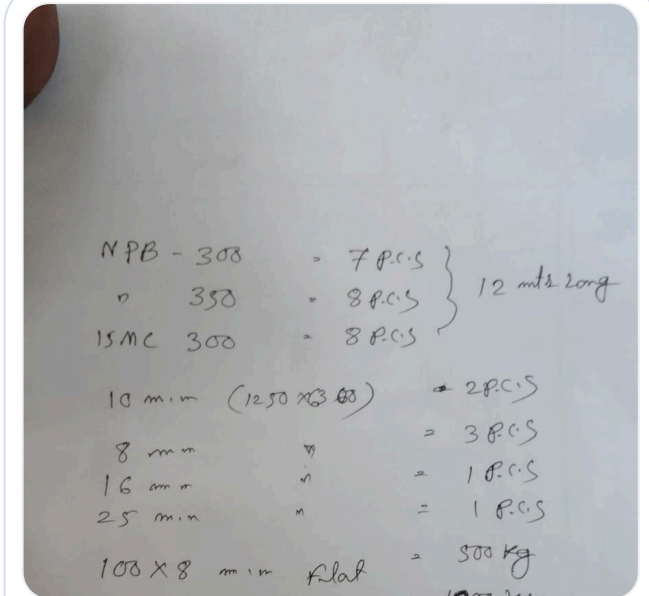

Messy input. Useful order data.

Steel example: sections, pcs, tons.

Material example: thickness, size, kg.

Mixed list: length, pcs, kg.

Fields Fracto reads

Item group

Master SKU

Spec / dimensions

Grade / thickness

Length

Pieces

Weight

Brand / make

Needs review

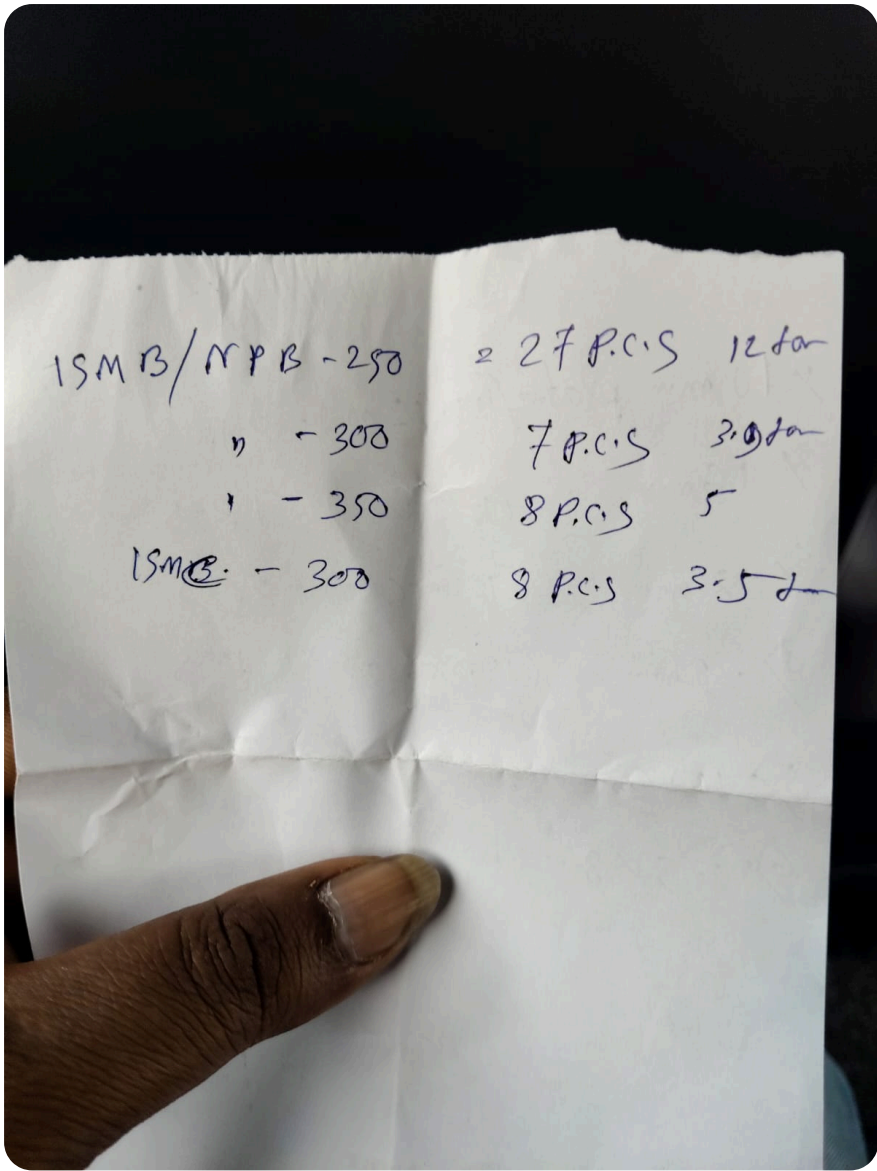

IMAGE TO ORDER ROWS

Example: handwritten order to master-matched rows.

The screenshot becomes matched items with quantity, UOM, and review flags.

DETECTED LINE	MASTER MATCH	PIECES	WEIGHT
ISMB/NPB 250	JOIST/B EAM 250 x 125 SAIL	27 PCS	12 TON
NPB 300	JOIST/B EAM 300 x 140 LOCAL	7 PCS	3 TON
NPB 350	JOIST/B EAM 350 x 140 LOCAL	8 PCS	5 TON
ISMC 300	CHANNEL 300 LOCAL	8 PCS	3.5 TON

Review logic

Inferred brand, size, or section: **needs_review: true.**

API OUTPUT

Output that can enter quote or ERP flows.

Not raw OCR. Normalized, master-matched rows.

Per-line fields

- SKU, item group, brand / make
- Quantity, UOM, length, weight, notes
- Spec, dimensions, grade, or thickness
- Confidence and review flag

Output channels

REST API

Webhook

CSV

ERP payload

Reviewer queue

Example JSON payload

```
{
  "status": "ok",
  "line_items": [
    {
      "item_code": "JOIST/BEAM | 250 x 125 | SAIL",
      "item_group": "Joist/Beam",
      "quantity": 27,
      "uom": "PCS",
      "weight": 12,
      "weight_uom": "TON",
      "dimensions": "250 x 125",
      "needs_review": true
    },
    {
      "item_code": "JOIST/BEAM | 300 x 140 | LOCAL",
      "item_group": "Joist/Beam",
      "quantity": 7,
      "uom": "PCS",
      "weight": 3,
      "weight_uom": "TON",
      "dimensions": "300 x 140",
      "needs_review": true
    }
  ]
}
```

BEST FIT + NEXT STEP

Pilot on real order inputs.

Best for industrial suppliers, manufacturers, distributors, fabrication/EPC teams, and material desks.

What the pilot proves

- 50 to 200 real order images, emails, PDFs, or chat samples
- Match against item/product master and aliases
- Return JSON / CSV / review queue
- Measure accuracy and quote-time saved

70 to 90%

Less retyping.

2 to 4x

Faster quote prep.

1 layerExtract, match,
review.
