

PRODUCT MARKETING DECK

From booking confirmation to sailed, without the manual drag.

Shipments AI keeps confirmed shipments moving: AI checks the trail, Fracto handles exceptions, and branches stay in control.

Booking confirmation

Job creation

ROTTERDAM

● Booking confirmed 09:12

● SI cutoff today 16:00

● Invoice missing Client

● Route checked Fracto

Fields captured

Carrier portal checked

Fracto review queue

WHY THIS MATTERS

Freight forwarders do not lose margin on one task. They lose it across every handoff.

After confirmation, work splits across emails, portals, PDFs, TMS screens, and manual follow-ups.

Cutoffs move faster than inboxes

SI, VGM, gate-in, docs, and customs cutoffs sit in scattered messages.

Operators re-key the same facts

Ports, parties, containers, weights, references, and contacts get copied again and again.

Exceptions are invisible until late

Missing invoices, BL mismatches, and portal failures show up too late.

WHAT FRACTO DELIVERS

Fracto runs the pre-sail follow-up desk for each shipment.

AI does the first pass. Fracto operators handle exceptions. Each correction improves the next check.

Read and audit documents

Check confirmations, invoices, VGM, BL drafts, screenshots, and emails.

Prepare and place booking

Prepare booking details, submit through agreed flows, and track confirmation.

Confirm to right parties

Share booking number, carrier, vessel, ETD/ETA, and next steps.

File SI and VGM

Prepare and submit SI/VGM, with review for unclear cases.

Send reminders

Chase missing invoices, SI details, VGM, approvals, and BL sign-off.

Human review when needed

Review unclear fields, BL mismatches, approvals, and portal failures.

AI-native service model

AI reads first. Humans review exceptions. Every action keeps source proof.

CONFIRMATION TO SAIL

A complete service lane from booking confirmation to sailing.

The day-to-day work Fracto can support for an export/import desk.

1

Booking received

Read customer request and documents

2

Booking placed

Prepare, submit, track confirmation

3

Parties updated

Share booking confirmation and next steps

4

Container details

Number, seal, size, weight, pickup

5

SI and VGM filed

Prepare, check, submit, follow up

6

Cut-offs and docs

Track deadlines and missing papers

7

BL and approval

Check draft BL and chase approval

8

Release and sailed

Final BL, release, sailing confirmation

Included Fracto services

- Prepare bookings and maintain the shipment file.
- Read documents, file SI/VGM, and chase gaps.
- Check carrier status and keep source proof.

Where humans stay in the loop

- Unclear or conflicting fields go to review.
- BL, approval, and release issues get operator attention.
- Portal failures and sailing-risk cases escalate with evidence.

BUSINESS IMPACT

What changes for a freight forwarding branch.

More shipments per operator

Routine checks, follow-ups, and reminders move to Fracto.

Fewer cutoff misses

Every shipment has cut-offs, risk flags, owner, and next action.

Cleaner customer experience

Customers get document requests, approval nudges, and timely status.

Better audit and control

Leaders see source proof, notes, and operator decisions.

Operating metrics we track

- Shipments by carrier, client, branch, and lane.
- Cutoff adherence and document aging.
- Reviews, escalations, and recurring exceptions.

What leadership gets

- A live pre-sail dashboard.
- Standard process across branches.
- Less manual work, with control intact.

MARKET PROOF TO PURSUE

Validate on freight forwarders with real documentation density.

Two target profiles with dense documents, deadlines, follow-ups, and repeat lanes.

Forwarder profiles

HERMES TRAVEL & CARGO

NOBLE SHIPPING PVT.
LTD.

Why these accounts fit the wedge

- Hermes spans air, ocean, multimodal, and customs brokerage.
- Noble focuses on documentation, forwarding, NVOCC, LCL, and USA lanes.
- Both create pre-sail work: docs, cut-offs, BL review, and exceptions.

Validation question

Can we reduce workload without changing the branch's TMS, portals, or email flow?

Proof package

Run confirmations, SI/VGM, BL drafts, invoices, packing lists, and carrier updates.

Decision readout

Show status, pending docs, cut-off risk, interventions, and recurring exceptions.

HOW TO BUY

Start with one lane. Scale to an outsourced pre-sail pod.

Pilot pod

One branch, 1-2 carriers, limited volume, weekly readout.

30 days

Proof

Managed service

Dedicated coverage for follow-ups, document chase, carrier checks, and dashboards.

Monthly

SLA

Scaled control tower

More branches, carriers, TMS updates, SOPs, and exception reduction.

Scale

Governance

Commercial model options

Per-shipment, managed pod, or hybrid pricing. Final model depends on volume, carrier mix, customer complexity, and system-update scope.

ROLLOUT

A pilot path without big-bang transformation.

1. Map the lane

Collect samples, SOPs, portal steps, and escalation rules.

2. Configure the service

Set fields, cut-offs, templates, actions, and review queues.

3. Shadow operations

Observe, assist, then take over agreed steps.

4. Go live and scale

Move selected volume, measure outcomes, then expand.

Inputs needed from the forwarder

- Carrier portal access and TMS test login.
- Sample emails, documents, BL drafts, and confirmations.
- Contacts, templates, approvals, and escalation rules.

Outputs from Shipments AI

- Live shipment list with owner and next action.
- Configured checks for docs, SI, VGM, BL, and approvals.
- Weekly readout on risk, exceptions, and improvements.

PILOT PROPOSAL

Let us run one pre-sail lane end to end.

Pick one branch, one lane, two carriers, and representative volume.
Fracto runs the workflow and reports weekly.

Lane selected

Carrier access

Sample documents

Ops owner

Success criteria for the pilot

- Every shipment has owner, cut-off, next action, and status.
- Missing docs and approvals are chased.
- BL, portal, and carrier issues get human review.
- Leadership gets a weekly risk and throughput readout.
