

AI Workflows for Document-Heavy Operations

Fracto handles document intake, checks, approvals, and system updates for regulated operations teams.

USED BY OPERATIONS TEAMS IN INDIA AND THE GULF ACROSS LENDING, LOGISTICS, AND COMPLIANCE-HEAVY WORKFLOWS.

Lending teams

Logistics teams

Compliance-heavy workflows

Audit-ready automation

CATEGORY

CORE

AI workflows

For document-heavy operations

BUILT-IN

Document AI

Reads, extracts, and structures documents

SCALE

More workflows + volume

Expansion revenue over time

Problem — Manual Document Workflows Create Cost + Compliance Risk

INBOX → SPREADSHEETS → THREADS → CORE SYSTEMS. THE MEASURABLE PAIN IS REWORK, SLA DELAY, AND AUDIT EXPOSURE.

Baseline workflow today

- 1 INBOX / PORTAL / WHATSAPP**
PDFs, scans, emails, attachments.
- 2 KEYING + SPREADSHEETS**
Manual extraction, checks, rework.
- 3 APPROVALS IN THREADS**
Email/WhatsApp approvals, missing trail.
- 4 CORE SYSTEMS**
LOS / ERP / TMS updated by hand.

Result: exceptions are not tracked end-to-end; audit evidence lives in folders + message threads.

Operational impact

- SLA delays (manual keying + rework).
- Audit gaps (approvals in threads).
- Cost scales linearly with volume.

MEASURE

Docs / month

Volume where manual work becomes a budget line.

MEASURE

Rework %

Exceptions, missing fields, duplicate review.

MEASURE

SLA hours

Delay from intake to system-ready output.

OCR alone isn't enough — teams need approvals, audit trails, and controlled system updates.

Why Now — Compliance Has Moved Before the Pilot

BUYERS NOW SHORTLIST TOOLS THEY CAN DEPLOY SECURELY, NOT JUST TEST QUICKLY.

3 triggers

- **Local data handling:** India/UAE processing is moving from preference to requirement.
- **Audit-ready setup:** buyers want controls, trails, and exit clarity upfront.
- **Workflow-grade AI:** extraction is good enough for approvals and write-back.

What changed in buying behavior

- Budgets are shifting from OCR pilots to workflow automation.
- Security and audit terms are reviewed before pilots.
- Buyers prefer tools that plug into existing systems.

The buying decision has moved from OCR accuracy to deployable workflow software.

Market Opportunity — Start with BFSI & Logistics, Then Expand

INDIA + GCC ~\$1.5B SPEND ('25E) · GLOBAL \$15–17B TAM

Market size snapshot

\$0.9B India document workflow
spend ('25e)

\$0.6B GCC document workflow
spend ('25e)

\$15–17B Global document
automation TAM ('25e)

Wedge → expand

NBFC underwriting

Logistics billing

Compliance + audit

Best first wedge: teams processing 10k+ pages/month where extracted data must be validated, approved, and written back to LOS/ERP/TMS.

BUYER

Ops + compliance owner

Clear business owner for SLA and audit outcomes.

DATA PATH

System of record known

Output has to update an existing core system.

EXPANSION

More workflows per logo

Usage grows via volume and adjacent document flows.

AI Workflow Platform with Built-in Document AI

ONE PLATFORM FOR INTAKE, EXTRACTION, VALIDATION, APPROVALS, AND SYSTEM UPDATES.

Designed to replace inbox → spreadsheet → thread handoffs with one accountable workflow run.

PRODUCT

AI workflows

Built-in document AI

Policy validators

Tasks + approvals

Controlled write-back

HOW IT WORKS

4-step loop

1

INTAKE

Email / web-hook / API → one workflow run.

2

PARSE + NORMALIZE

PDFs → clean text + fields.

3

EXTRACT + VALIDATE

Checks + exception routing.

4

EXECUTE

Approvals → controlled write-back.

OUTCOMES

Ops impact in weeks

Fewer handoffs

Exceptions-only operations

Audit-ready execution

Traction — Customer Adoption

REFERENCES ACROSS INDIA AND THE GCC IN LENDING, LOGISTICS, AND COMPLIANCE-HEAVY OPERATIONS.

Monthly onboardings

— Onboardings

ACTIVE CLIENTS

GCC REFERENCES

Traction — More Usage, More Revenue

AS CUSTOMERS PROCESS MORE DOCUMENTS AND ADD WORKFLOWS, RECURRING REVENUE RISES WITH THEM.

Quarterly pages processed

Apr-25 Jun '26: 1,128,007 pages; 3.3M+ total processed as of 25 June 2026.

■ Completed quarter ■ Q2 '26 through 25 Jun

Monthly revenue (₹)

Actual revenue through Jun '26; Jun expected was ₹8.98L. Dashed segment is Jul-Sep expected from client confirmations.

— Actual revenue - - Expected from client confirmations

Moat — Local, Embedded, and Compounding

LOCAL DEPLOYMENT, SYSTEM WRITE-BACK, AND WORKFLOW LEARNING COMPOUND ACROSS LIVE ACCOUNTS.

Deployment moat India/UAE VPC-ready for residency and audit-sensitive buyers

Workflow moat Approvals, exceptions, and controlled write-back into LOS/ERP/TMS

Learning moat Validators and exception logic compound with every workflow

Logistics document-to-billing flow

- Input** PoDs, LRs, delivery proofs, invoice attachments.
- Workflow** Read → validate against shipment data → approval queue → TMS/ERP update.
- Expansion** Billing support → claims, reconciliation, and audit packs.

Extraction can be copied; local deployment, audit-native execution, and workflow history are harder to replicate.

Pricing & Unit Economics — Platform + Usage

BASE PLATFORM + SETUP + VOLUME-BASED USAGE.

Example: 100k pages/month → ~₹2.5L usage + ₹25k base.

Next Steps & Diligence Path

WORKING SESSION → WORKFLOW DEEP DIVE → DILIGENCE CADENCE.

How we propose to engage

- **30-minute working session** to align on fit.
- **Tailored deep dive** on priority workflows.
- **Diligence & closing path** with a clear cadence.
- **Data room** available after the first call.
