

Turn WhatsApp steel orders into ERP-ready line items.

Fracto reads handwritten steel orders, matches product masters, and returns quote-ready rows.

- Read WhatsApp images and handwritten lists
- Extract item, size, pieces, length, and weight
- Match NPB, ISMB, flats, plates, and aliases to SKUs
- Flag unclear rows for review

Steel traders

Distributors

Fabrication suppliers

Industrial material desks

What this changes

Order ready

Screenshot to line items

Master matched

Aliases to SKUs

Ops ready

Clean fields and flags

Quote faster

Less retyping

Positioning

Manual order reading out. Product-master matched rows in.

THE OPERATIONAL PROBLEM

Steel order intake breaks between WhatsApp and ERP.

Photos and shorthand still have to become SKU-matched quote rows.

01

Order arrives

WhatsApp photo or chat list.

02

Decode

NPB, ISMB, plate, flat shorthand.

03

Match

SKU, size, brand, grade, UOM.

04

Enter

Quote, ERP, Excel, or review queue.

Why it slows down

- ERP names differ from customer shorthand
- One row can include size, pcs, kg, and tonnage
- Brand, grade, or length may be implied

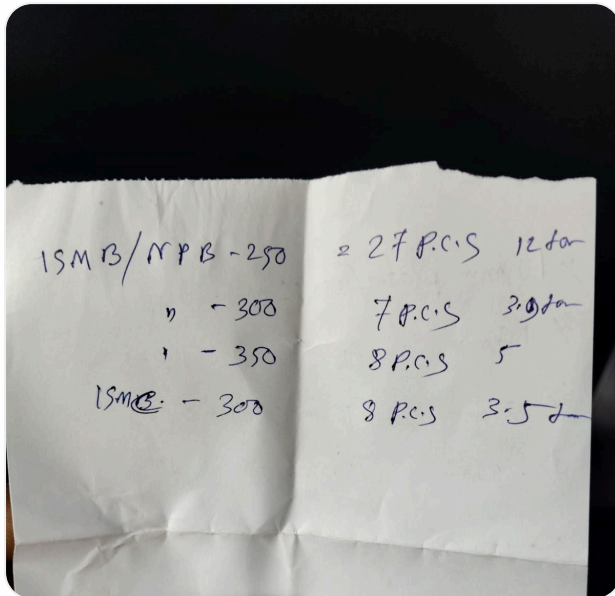

What Fracto adds

- Steel-aware extraction
- Product-master lookup before quote
- Exception routing for unclear rows

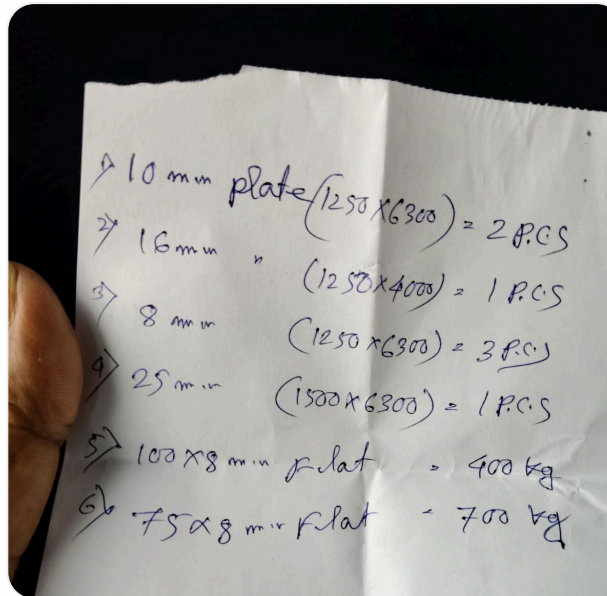

SAMPLE WHATSAPP ORDERS

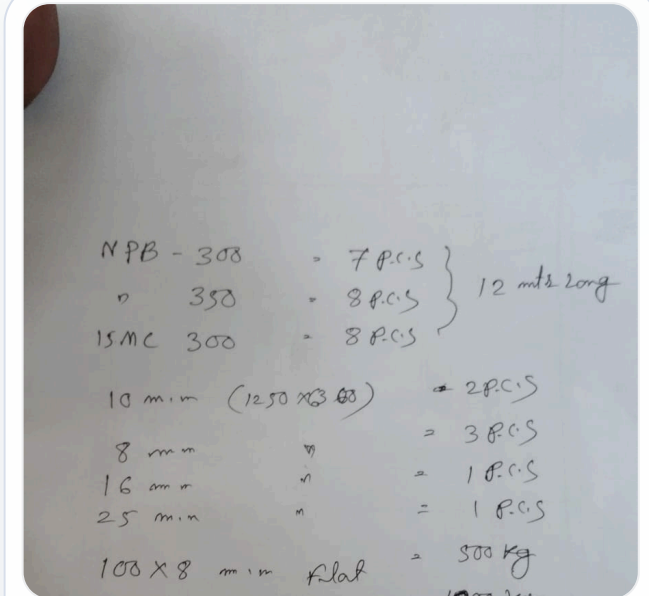

Messy input. Useful order data.

Beams/channels: sections, pcs, tons.

Plates/flats: thickness, size, kg.

Mixed list: 12 m, pcs, kg.

Fields Fracto reads

Item group

Master SKU

Dimensions

Thickness

Length

Pieces

Weight

Brand

Needs review

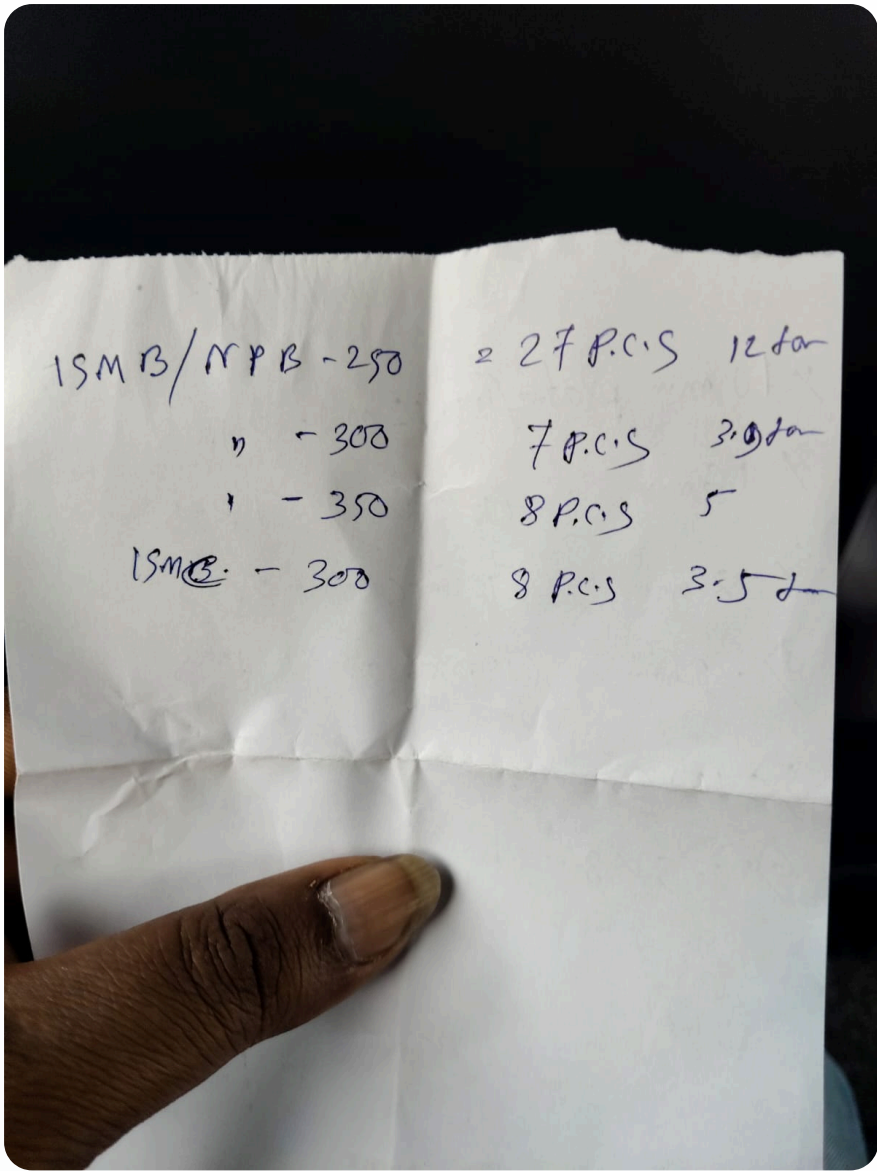

IMAGE TO ORDER ROWS

Example: handwritten beams to order rows.

The screenshot becomes matched items with pcs, tonnage, and review flags.

DETECTED LINE	MASTER MATCH	PIECES	WEIGHT
ISMB/NPB 250	JOIST/B EAM 250 x 125 SAIL	27 PCS	12 TON
NPB 300	JOIST/B EAM 300 x 140 LOCAL	7 PCS	3 TON
NPB 350	JOIST/B EAM 350 x 140 LOCAL	8 PCS	5 TON
ISMC 300	CHANNEL 300 LOCAL	8 PCS	3.5 TON

Review logic

Inferred brand, size, or section: **needs_review: true.**

API OUTPUT

Output that can enter quote or ERP flows.

Not raw OCR. Normalized rows.

Per-line fields

- SKU, item group, brand
- Pieces, length, weight, UOM
- Dimensions and thickness
- Confidence and review flag

Output channels

REST API

Webhook

CSV

ERP payload

Reviewer queue

Example JSON payload

```
{
  "status": "ok",
  "line_items": [
    {
      "item_code": "JOIST/BEAM | 250 x 125 | SAIL",
      "item_group": "Joist/Beam",
      "quantity": 27,
      "uom": "PCS",
      "weight": 12,
      "weight_uom": "TON",
      "dimensions": "250 x 125",
      "needs_review": true
    },
    {
      "item_code": "JOIST/BEAM | 300 x 140 | LOCAL",
      "item_group": "Joist/Beam",
      "quantity": 7,
      "uom": "PCS",
      "weight": 3,
      "weight_uom": "TON",
      "dimensions": "300 x 140",
      "needs_review": true
    }
  ]
}
```

BEST FIT + NEXT STEP

Pilot on real WhatsApp orders.

Best for steel traders, stockists, distributors, and fabrication suppliers.

What the pilot proves

- 50 to 200 real order images
- Match against item master and aliases
- Return JSON / CSV / review queue
- Measure accuracy and quote-time saved

70 to 90%

Less retyping.

2 to 4x

Faster quote prep.

1 layerExtract, match,
review.
